# Leica IPAS20 Upgrade for POS V4 PCS owners

Keep your ALS working for you

Your ALS system has worked hard for you. Extend its life and assure continued support by upgrading to IPAS20. IPAS20 supports all ALS IMUs, including LN-200 and AIMU. Replacing out-of-support POS V4 PCS hardware with IPAS20 keeps your ALS running now and into the future. And with IPAS20 GPS+GLONASS support, your ALS can work in more places. Now the benefits of IPAS20 are available to ALS40, ALS50-I and ALS50-I+ owners at preferential prices. Keep your ALS working for you.

### Leica IPAS20 Upgrade Key Benefits

- Performance Accuracy proven over 75 IPAS systems to date
- Mobility Optional GPS+GLONASS antenna extends geographic coverage
- Flexibility Supports all ALS IMU types
- Workflow All-Leica workflow for intuitive processing
- Expandable Easy upgrade to FCMS flight navigation
- Support One-call support for all GNSS/IMU needs, including hardware

## Leica IPAS20 Upgrade for POS V4 PCS owners Keep your ALS working for you

Get the most out of your ALS 40, ALS50-I or ALS50-I+ with an upgrade to IPAS20. Leica Geosystems now offers a simple, turn-key replacement for POS V4 PCS hardware, no matter what type IMU your ALS system currently uses. Not only is supportability enhanced, but with the optional GPS+GLONASS antenna, flexibility in operation is increased, too.

### Make a smooth transition to today's GNSS/IMU solution

Kits include all mounting hardware, cabling, firmware and software needed to replace aging POS V4 PCS hardware, without any changes to ALS Equipment Rack configuration. IPAS Pro has a familiar feel and all the performance users demand from their GNSS/IMU processing software, yet with a more intuitive user interface.

#### Leica IPAS20 Upgrade advantages include:

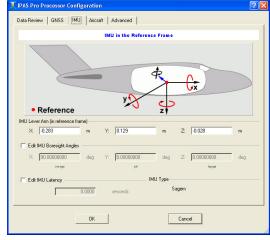

- New, reliable GNSS/IMU system hardware
- Hardware fully compatible with existing installations in ALS equipment racks
- Interfaces to existing DMARS (AIMU) or LN200 IMUs
- All hardware and workflow from Leica Geosystems, simplifying support, service and repairs
- Perfect fit with Leica Geosystems' airborne sensor workflow FPES → FCMS → IPAS, etc.
- GPS+GLONASS support

Get more years, more flexibility and superior support for your ALS system with an IPAS20 upgrade. Available and in stock now with special turn-key kit pricing.

Leica IPAS20 – today's GNSS/IMU system, packaged specifically for both stand-alone and POS V4 PCS replacement applications

Leica IPAS Pro – Familiar and intuitive GNSS/IMU processing workflow

Total Quality Management – our commitment to total customer satisfaction.
